JOB TITLE

Full stack software developer with a track record for details and problem-solving established from years in the financial sector. My experience working in a large investment bank has enabled me to be a confident team player who strives to deliver results in the most challenging of circumstances. I am currently supporting the production environment of an international nonprofit organization which is sharpening my skill in front-end development. I look forward to building React components for your organization.

TECHNICAL SKILLS- JavaScript | React.js | Ruby on Rails | PostgreSQL | Gatsby | GraphQL | HTML | CSS

TECHNICAL PROJECTS

Clientology - [Github](#) | [Demo](#)

An online client book for a luxury retail brand

- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side
- Employed JavaScript on the frontend along with the React library
- The backend is written in Ruby and utilizes the Rails framework
- A user is able to store clients, notes, purchases and profiles

Open Chessame - [Github](#) | [Demo](#)

An app designed to help users track and improve their chess openings

- Dynamic database which includes user info, openings, and games which allows users to view nested data
- Accessed the Youtube API to provide video instruction on opening chess moves
- Employed Material UI to style components for a stunning in-browser experience

Arnold's Fitness Tracker - [Github](#) | [Demo](#)

A fitness tracker to keep track of workouts and exercises historically

- Utilized Ruby on the backend along with the Sinatra library
- Employed Semantic UI to style components
- Created search function to help a user filter through data
